

1. Turn on your Kindle Fire 2nd generation device (for example, Kindle Fire HD). Make sure you have an active Wi-Fi connection.
2. From the home screen, tap **Apps > Email**.
3. If you haven't created an email account on your Kindle before, on the **Add Account** page, tap **Other provider**. If you already have one or more email accounts on your Kindle Fire, tap the **menu icon > Settings > Add Account > Other provider**.
4. On the **Add Account** page, in **Name**, type your name. In **E-mail address**, type your full 1791 email address. In **Password**, type **YOUR 1791 EMAIL Password, the same password you use to sign in through the 1791 site** Tap **Next**.
5. Tap **IMAP**. We recommend IMAP because IMAP supports more features.
6. Under **Incoming server settings**, you'll notice that the settings are already filled in for you. You'll have to change some of those settings.
 - a. In **Username**, make sure it matches for your full 1791 email address. In **Password**, type **YOUR 1791 EMAIL Password, the same password you use to sign in through the 1791 site** In **IMAP Server**, type the IMAP server name **secure.emailsrvr.com** In **Security type**, select **SSL**.
 - b. In **Port**, make sure it is set to **993** if you're using IMAP. Tap **Next**.
7. Under **Outgoing server settings**, you'll notice that the settings are already filled in for you. You'll have to change some of those settings.
 - a. In **SMTP server**, type the SMTP server name. **secure.emailsrvr.com** In **Security type**, select **SSL**.
 - b. In **Port**, make sure **465** is selected.
 - c. Under **Port**, make sure **Require sign in** is selected.
 - d. In **Username**, type your full 1791 email address. In **Password**, type **YOUR 1791 EMAIL Password, the same password you use to sign in through the 1791 site**
8. On the **Finish** page, type a display name and account name, and then tap **View your inbox** to access your email.
